

# Quality Policy

Distinguished by a qualified team, a reliable concept of management, a full range of services, and established partners, we provide outstanding results that are economically and environmentally efficient as well as time-saving to ensure the satisfaction and trust of our clients.

As we are involved with the execution of the most demanding international projects, we are committed to honour, develop, monitor, and expand our Quality Policy.

We are well aware that this is only possible with the active participation of our employees, partners, and suppliers, whom we encourage to operate in keeping with the requirements, standards, and best practices that we follow ourselves.

These are the main principles of the company's Quality Policy:

- Constantly harmonising management systems with the current legal and other requirements related to quality.
- Adapting the management system to meet the specific project requirements and client demands.
- Introducing clear and measurable quality targets into the management system.
- Raising awareness among the company employees of the contents, requirements, and objectives of the Quality Policy.
- Active introduction of international good practices in the field of quality management systems.
- Adopt to Functional Safety Management requirements as per IEC 61508 and IEC 61511, for safety related services and products.
- Continuous monitoring of key criteria of quality and client satisfaction.
- Active introduction of the latest standards in the field of management systems.
- Continuously introducing, implementing and monitoring corrective measures in the quality system.
- Actively monitoring whether our suppliers and subcontractors meet the key criteria of quality systems.
- Attaining goals that will contribute to the successful long-term development of the company and its employees.
